

The Pallea pallet lifter is a Swedish innovation that simplifies the handling of heavy objects. Pallea has many advantages compared with traditional pallet lifters: it is lighter, more mobile, foldable and space-saving.

The wheels turn 360 degrees – you can turn on a sixpence. Wide loads can negotiate narrow passages by pulling the object through the gap at a 90 degree angle. The Pallea pallet lifter is highly manoeuvrable and works particularly well in tight spaces, on trucks, small storage areas and in narrow store aisles. Because the Pallea pallet lifter has no hydraulics, and no oil, it is perfect in cold rooms.

The Pallea pallet lifter is CE marked

The Pallea pallet lifter complies with the European requirements for safety, function and environment. Each Pallea pallet lifter is supplied with an operating manual which clearly describes how to use it correctly and safely from an ergonomic point of view.

High quality and control of your production

The Pallea pallet lifter is developed, designed and manufactured in Sweden. We at Pallea AB have full control and know exactly what we are selling. For more information about the Pallea, please visit us at www.pallea.com

Pallea – a really smart complement to traditional pallet lifters

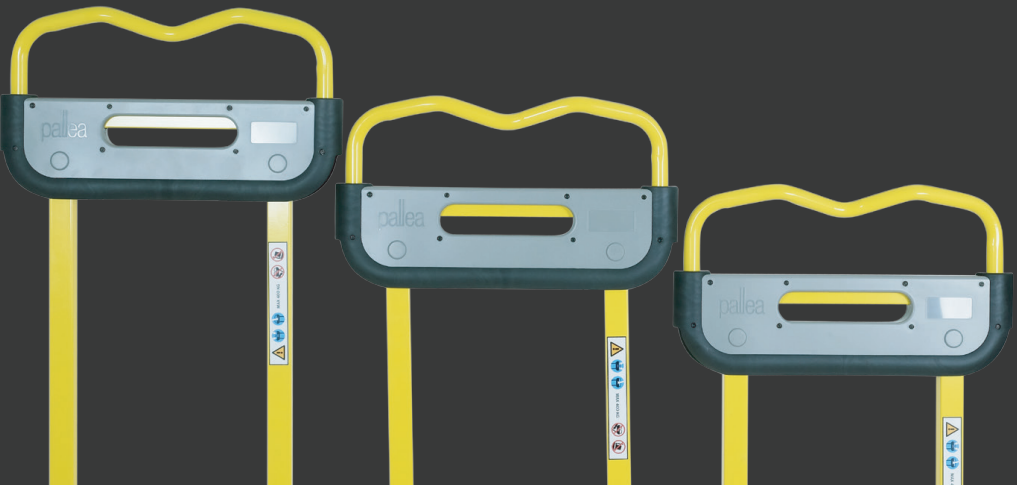

Pallea is available in three models

All the Pallea lifters are adapted for EUR pallets. The Pallea EUR Basic takes whole pallets, the Pallea EUR Cross is adjusted in length to lift EUR pallets from the side, and the Pallea EUR Comfort lifts half pallets. The maximum weight is 400 kg. Of course, you can use the Pallea pallet lifter for other purposes. For example you can load cartons or other items you need to move directly onto the forks. All pallet lifters can be adjusted in height.

<p>Pallea EUR Comfort Half pallet Length: 60 cm Height: 120-150 cm Weight: 19 kg Art. no. SE15-03</p> 	<p>Pallea EUR Cross Cross length Length: 80 cm Height: 120-150 cm Weight: 20 kg Art. no. SE15-02</p> 	<p>Pallea EUR Basic Full length Length: 120 cm Height: 120-150 cm Weight: 22 kg Art. no. SE15-01</p> 
--	---	--

You can easily adjust the height of the control handles in three steps: 120 cm, 135 cm and 150 cm. The height adjustment provides a more ergonomic handling but it also brings with it an adjustment of lifting power.

TURN THE PALLET ROUND EASILY, 360° TURN

EASY TO MANOEUVRE!

FOLD THE PALLEA TOGETHER AND IT TAKES UP VERY LITTLE SPACE

WIDE LOADS PASS THROUGH DOORS CROSSWISE

PERFECT FOR THE COURIER'S VAN, IN THE SHOP OR AT THE CONSTRUCTION SITE

GLASS, GYPSUM, AND BUILDING BOARDS CAN BE TRANSPORTED LEANING AGAINST THE HANDLE INSTEAD OF LYING DOWN

TIGHTER TURNING RADIUS THAN THE TRADITIONAL PALLET LIFTER!
